Structure made of a metal canopy coated with epoxy powders and three metal or two-tone leather suspensions, inspired by the shape of the Chinese lanterns. The light diffuses through a double-walled borosilicate glass spherical diffuser with Ø16 cm and an integrated LED source for direct downlighting.

ABOUT

Collection of lamps inspired by the classic Chinese lanterns. The particular bi-dimensional structure is made by powder coated painted metal on the outside, while the inside color is sand gray. A new version in a two coloured leather has enriched the collection. The light source is located inside a double-sided borosilicate glass diffuser, while the suspensions have an additional integrated LED light source in order to create a direct illumination downwards.
