 IP40		

Structure made from central body, brackets and circular metal base, coated with epoxy powders. The domes (external and internal) create the double color effect. Clear double-wall borosilicate glasses Ø160mm. Integrated dimmer on cable.

ABOUT

Collection of neo-vintage metal lamps with a double-sided diffuser in borosilicate glass. The metal domes (one internal and the other one external) have the internal side with different colors or finishing; they can be painted or finished in polished brass and bright copper, thus to create different textural combinations. The collection presents hanging lamps, floor lamp, table lamp, wall and ceiling. The hanging and wall lamp version are provided with a further G9 source located in the lower part of the lamp.
